

Venkata Kavya

AI/ML Engineer · LLM Applications · Agentic AI · Product Engineering

Email	venkatakavya1100@gmail.com
Portfolio	kavyabuilds.vercel.app
GitHub	github.com/venkata-kavya
Academic	GPA 9.19

PROFILE

Final-year engineering student focused on building practical AI/ML systems and polished developer products. Comfortable across LLM applications, RAG, embeddings, agent orchestration, Python backends and modern React interfaces.

EXPERIENCE

Cognizant — AIML Intern · Feb–May 2026

Worked in an AIML training/internship environment, building and evaluating working AI/ML models while developing practical skills across Python, SQL, machine learning and modern AI tooling.

PROJECTS

KARTA — Gamified neural thought-mapping mobile experience combining React Native/Expo, Supabase, Pinecone, embeddings and LLM-driven product ideas.

AI Resume Analyzer — AI-powered resume analysis experience using React, TypeScript, Vite, Tailwind CSS and LLM APIs.

Atelier Céleste — Premium bakery web experience using React, Vite, Tailwind CSS, Framer Motion and smooth scrolling with an editorial visual system.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL, C

AI/LLM: LLM APIs, RAG, Embeddings, Context Engineering, Prompt Engineering, Tool Calling, Structured Outputs, LLM Evaluation, Guardrails

Agentic AI: LangChain, LangGraph, MCP, Agent Orchestration, Tool-Using Agents, Multi-Agent Systems

Infrastructure: LiteLLM, Pinecone, pgvector, Semantic Search, Vector Search, Reranking

Backend/Frontend: FastAPI, Flask, Node.js, Express.js, REST APIs, React, TypeScript, Tailwind CSS

Databases/DevOps: PostgreSQL, MongoDB, MySQL, Docker, GitHub Actions, CI/CD

CODING & ACHIEVEMENTS

300+ LeetCode problems · 1× MRDU hackathon winner · 1× ideathon winner
